

SECLocator

The value of Location in the Security Sector

SECLocator is Genasys solution for the Security Sector

Genasys : Expertise in Location

Genasys is a world leader in Location and Technological Spatial Solutions.

Mobile telecommunications operators worldwide (among which there are Telefónica and Vodafone) have chosen and use the **GPP** (Genasys Positioning Platform) technology to provide Location Based Services.

Genasys is a leader in the Spanish market when it comes to supply of multi-Technology locations and multi-Operator in the business market.

The location of mobile devices is essential in the more and more demanding security and protection services segment.

SECLocator is a product specifically designed for the Security Sector, the result of several years experience of Genasys in services based on multi-Technology Location.

As a tool it provides the security company with: Monitoring, Control and Management of their Employees, in charge of both personal protection services (escorts) and surveillance services.

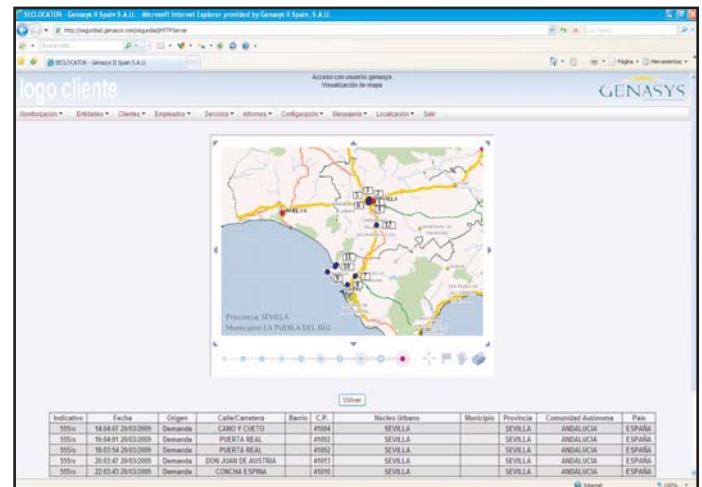

Genasys provides its Location Solutions and Technologies to the main Bodies and Companies of the Spanish Security Sector, both in the Public and Private area, among which we can find:

- SPANISH GOVERNMENT
- EULEN
- PROSEGUR
- SECURITAS
- COVIAR

- OMBUDS
- GRUPO SEGUR
- SEGURIBER
- PROSETECNISA
- P3

Benefits for users :

- Control and track of all the resources in real time.
- Optimizing the management of resources.
- Highest functionality in just one device.
- Increase of security.
